

# WHO Information Network for Epidemics – WEBINARS

## Contact tracing in the context of COVID-19

Contact tracing can break the chains of transmission of an infectious disease and is thus an essential public health tool for controlling infectious disease outbreaks. On this webinar experts from the World Health Organization will share guidance on why and how to establish contact tracing capacity. Participants will then be able to hear about the development of contact tracing apps in Switzerland and Austria.

Tuesday **19 May** 14h00 Geneva; 17h30 Delhi; 08h00 Washington
